

Panled 50 is a colour changer panel with a high intensity, pragmatic applications and a simple working; control by DMX and RGB colour mix by LED's.

It offers a high dispersion with the plastic cover in milky colour, suitable for mural or ceiling in different patterns like public places, expositions, entrances, stage illuminations or relaxed environments.

For indoor decoration application, this devise needs to be connected to PANELDRIVE 50 which it can be drive by a DMX controller, using 3 DMX channels corresponding to the 3 RGB colour or in automatic mode, using the dip switch . With these dipswitches, it is possible to mark the DMX start address and of course we can connect many devises and create amazing chain effects.

#### FEATURES

##### PL 50

Power Output: 45 W

IP Rating: IP 44
